Gambling... What are the stakes for you?

How to stop? Know your limits...

Gambling is primarily a form of entertainment, but can also lead to a lot of problems.

In that case, it becomes an indispensable part of your life, a real drug, which makes you totally lose control of the situation.

This leaflet is not only intended as a preventive action, but to give heart to gambling addicts and remind them that they are not alone in facing the problem. There are people they can count on.

The Gaming Commission's team

Tips

to keep gambling fun :

By taking these tips, you can keep gambling fun. In any case, gambling will never be the solution to your financial, family or other problems, but will only make them worse. Keeping gambling will not solve your gambling debts either.

- Before starting to gamble :
try to set an amount of money and time for you to gamble
- Always be aware :
how much time it is taking you, and How much it costs you
- Don't try to **recoup** your losses
- Don't **gamble** your entire **winnings**
- Bear in mind that ultimately,
you will lose more than you will win.

Addiction

When are you addicted ?

Gambling addiction doesn't happen overnight. It gradually becomes harder to resist the urge to gamble. In the beginning, you perceive gambling as an amusing pastime. Pretty soon, you need more and more money to gamble, you spend more and more time gambling. Borrowed money has to be repaid, and family and friends take second place to gambling. Although you don't notice it immediately, you become dependent on gambling, and it becomes an obsession. Even if somebody says something to you about it, you continue, at all costs. But you can not recoup your losses. Gambling becomes your only interest. It isolates you from the outside world and causes you (financial, health) problems. You lose your zest for living.

Pathological gambling was recognised by the World Health Organisation as an illness in 1980. Up to 1st May 2018, the Gaming Commission was able to help 30,581 people by denying them access to Belgian casinos and gaming halls on a voluntary basis.

Test

Are you gambling too much ?

To test whether gambling is having an influence on your health, you can complete the following test. Answer the test as honestly as possible.

- 1 Sometimes I've felt depressed or anxious after a session of gambling YES NO
- 2 Sometimes I've felt guilty about the way I gamble YES NO
- 3 When I think about it, gambling has sometimes caused me problems YES NO
- 4 Sometimes I've found it better not to tell others, especially my family, about the amount of time or money I spend gambling YES NO
- 5 I often find that when I stop gambling I've run out of money YES NO
- 6 Often I get the urge to return to gambling to win back losses from a past session YES NO
- 7 Yes, I have received criticism about my gambling in the past YES NO
- 8 Yes, I have tried to win money to pay debts YES NO

Conclusion

This "EIGHT gambling screen" was developed by Sean Sullivan (1999).

If you answered "yes" 4 times or more, it may mean that you have a problem. The result of the test may be different, depending on whether you answer how it used to be or how it is now. If you think that gambling is having a negative impact on your health, it would be advisable to talk about it to your doctor or a person you trust. You can also contact an organisation that provides assistance in your area to discuss your concerns.

Addresses

Who can you contact ?

You can always discuss your problems with your doctor. You can also contact the following centres :
